1. Introduction

Dear customer, in this file you will find the latest information about the ETAS INCA V7.5. Important Note:

IT IS NECESSARY TO UPDATE ALL FIRMWARE WITH THE RECOMMENDED HARDWARE SERVICE PACK (HSP) V14.y BEFORE USING INCA V7.5 WITH HARDWARE

With each new ETAS INCA and ETAS INCA Service Pack, a higher HSP version must be used to update the hardware. Operation of hardware with a previous firmware version may result in erroneous operation.

Starting with INCA V7.4 SP2, the HSP is included in the INCA Service Pack. The latest recommended HSP version is also available on the ETAS Download Page.

1.1. Definitions and Abbreviations

Term/Abbreviation	Definition
CDM	Calibration Data Manager
EE	INCA Experimental Environment
EHI	ETAS Help Desk International
FW	Firmware
LiMa	ETAS License Manager
HSP	Hardware Service Pack
HF	Hotfix
HW	Hardware
MDA	INCA Measure and Data Analysis
MIP	MATLAB Integration Package
MR	Multi-Recorders
ОНІ	Open Hardware Integration
os	Operating System
KIR	Known Issue Report – For severe Problem Reports which occur after a release, ETAS has introduced the Known Issue Report to inform affected customer immediately. The current Known Issues of former versions can be found on the ETAS website: www.etas.com/kir
PR	Problem Report
SP	Service Pack
SP z	Service Pack version z; z corresponds to the refresh version of INCA
	(refer also to V x.y.z below)
SW	Software
VSD	Variable Selection Dialog
V x.y.z	Version; x: major version; y: minor version; z: refresh version
WB (or NetWB)	Walkback, INCA system error

1.2. References

None

1.3. Conventions

The following typographical conventions are used in this document:

Choose File →Open.	Menu commands are shown in boldface.		
Click OK . Buttons are shown in boldface.			
Press <enter>. Keyboard commands are shown in angled brackets.</enter>			
The "Open File" dialog box is displayed.	Names of program windows, dialog boxes, fields, etc. are shown in quotation marks.		
Select the file setup.exe Text in drop-down lists on the screen, program code, as well as partial file names are shown in the Courier font.			
A distribution is always a one- dimensional table of sample points.	General emphasis and new terms are set in italics.		

1.4. User Documentation

The INCA user documentation is available in PDF format on the DVD, the ETAS INCA Service Pack ZIP file (if downloaded from the ETAS Download Page), or in the installation folder on the PC.

It can be called up from INCA via the menu item ? \rightarrow Manuals and Tutorial or via the Windows start - menu: \rightarrow Program \rightarrow ETAS INCA 7.5 \rightarrow Manuals and Tutorial.

2. Product Definition

2.1. Functions at a glance

New functionality of INCA V7.5 is listed in the overview INCA-V7.5-Whats-new.PDF.

You find the overview INCA-V7.5-Whats-new.PDF on the installation DVD or ZIP in the folder \Documentation\WhatsNew or in the installation folder on the PC.

2.2. General Description

2.2.1. Safety Notice

Calibration activities influence the behavior of the ECU and the systems controlled by the ECU. This may result in unexpected behavior of the vehicle and thus can lead to safety critical situations.

Only well-trained personnel should be allowed to perform calibration activities.

Sending CAN messages influences the behavior of the CAN bus network and the systems connected to it. This may result in unexpected behavior of the vehicle and thus can lead to safety critical

situations.

Only well-trained personnel should be allowed to perform CAN message sending activities.

Calibrate measurement (Write to RAM) activities influence the behavior of the ECU and the systems controlled by the ECU. This may result in unexpected behavior of the vehicle and thus can lead to safety critical situations.

Only well-trained personnel should be allowed to perform calibrate measurements activities.

Important: The ETAS Safety Advice is available for several languages. Please read it carefully. The ETAS Safety Advice is displayed during start of INCA (Disclaimer) and it is also available in ETAS_Safety_Advice.pdf in the folder \Documentation\ReleaseNotes\of the installation package (ZIP file or DVD) or after installation of the INCA Service Pack in Program-Menu -> ETAS -> INCA 7.5 ServicePack in the folder \ReleaseNotes.

2.2.2. Known Issues Reports

If a technical problem occurs, ETAS creates a Known Issue Report (KIR) and publishes it online. The report contains information about the technical impact and the status of the solution. Therefore, you must check the KIR applicable to this ETAS product version and follow the corresponding instructions before using the product.

The Known Issue Report (KIR) can be found here: http://www.etas.com/kir

2.2.3. System Prerequisites

The system must meet the following minimum prerequisites:

Required Hardware	2 GHz Processor
	2 GB RAM
	DVD-ROM drive (for installation)
	Network adapter
	Graphics with a resolution of at least 1024 x 768, 256 MB RAM, 16bit color and DirectX 9
Required Operating System	Windows® 10 64 bit (version 1803 or higher) *)
	Windows® 10 64 bit Enterprise (LTSC 2016 or higher) *)
	Windows® 11 64 bit *)
	Windows® Server 2016 and 2019 64 bit *)
	(English, French, Japanese, Chinese and German OS version supported)
	*) Starting from INCA V7.3 only 64-bit operating systems are supported.
	Note:
	The support of Windows® Vista was discontinued with INCA V7.2 SP5, the support of Windows® 7 was discontinued with INCA V7.2 SP16, the support of Windows® 8 was discontinued with INCA V7.3 SP0, and the support of Windows® 8.1 was discontinued with INCA V7.5 SP0.
	(Refer also to INCA-V7.5-Whats-new.pdf)
Required Free Disk Space	5 GB (not including the size for user data; minimum required, but not recommended)

The recommended system prerequisites are:

Required Hardware	3 GHz Quad-Core Processor or equivalent				
	16 GB RAM				
	DVD-ROM drive (for installation)				
	Network adapter				
	Graphics with a resolution of at least 1280 x 1024, 1GB RAM, 32bit color and DirectX 9				
Required Operating System	Windows® 10 64 bit				
	(English, French, Japanese, Chinese and German OS version supported)				
Required Free Disk Space	>10 GB				
Performance	Investigation on performance showed:				
Recommendation	More Memory improves execution time of repetitive operations				
	SSD hard disks improve the file access times				

2.2.4. Software Prerequisites

Important notes:

- In order to use INCA the user needs read and write access to the registry path HKEY_LOCAL_MACHINE\Software\ETAS (for more details about privileges, please refer to the INCA_V7.5_Install_Guide_xx.pdf chapter "Privileges").
- Hyperthreading is supported.
- Multiple monitors may be used.

2.2.5. Restrictions

WINDOWS® XP, WINDOWS® 95, WINDOWS® NT, WINDOWS® 98SE, WINDOWS® 2000, Windows® Vista, Windows® 7, Windows® 8 and Windows® 8.1 are not supported.

INCA does no longer support PCMCIA adapters used in a Desktop PC for connecting ETAS hardware.

When using triggers to start or stop a recording, the recording duration has to be at least 3 seconds. In case of a shorter recording duration INCA might not be able to record all events. A period of at least one second is required after a pause event, before the start trigger condition may trigger again. Otherwise INCA does not recognize the pause and does not include an appropriate pause comment into the recorded data file. This may lead to unexpected display results in the MDA.

Since V6.2.0 INCA allows parsing A2L files containing 2-byte characters.

However the following restrictions apply:

- 2-byte strings are not always displayed correctly
- copy and compare of 2-byte strings is only possible if source and destination have the same encoding

MDA/INCA - Calculated Signals:

- It is recommended to use '.' as decimal symbol for defining calculated signals
- Using library functions in formulas might causes some differences in the number of samples
- Measure time as input signal does not work correctly (INCA issue only)
- Dependency view is not able to show more the 5 levels of a cascade
- Using different rasters as bases for calculated signals might cause wrong results

CDF V2.0

Rescale axis of Vector CDF files are rejected by INCA 6.2 (and subsequent)
 The reason is that Vector writes rescale axis in CDF V2.0 in a different way than INCA.

Write to RAM

When using CSE for Write to RAM, values in scenarios can be edited only in PHYS representation.

ETAS INCA V7.5 introduces a new version of the Target Server component.

For this reason, products that use an older version of the Target Server cannot be used for online operation in parallel with INCA V7.5.

For instance, if INCA V7.5 is used to measure and calibrate an ECU, the Experiment Environment that is not released for operation with INCA 7.5 cannot access the corresponding prototyping hardware during bypass operation at the same time.

For these use cases, use either the recommended former INCA version or the version of the Experiment Environment, LABCAR-OPERATOR, or INTECRIO that is compatible with INCA V7.5.

2.2.6. Miscellaneous

Problems may arise with new scan engines of virus scan tools. To ensure the highest data security for data in the INCA database, the database is directly saved after every data change or access. This leads to a high number of read/write cycles, and this might initiate the scan engine of the virus scan tools to check the differences if the option 'scan all files' is set. This leads to a delay working with INCA. We recommend excluding all files of the INCA database from scanning.

Whenever uninstalling INCA, the included INCA uninstall program should be used. This ensures that all add-ons and other products installed with INCA are also uninstalled (except ETASData and ETAS License Manager). Never delete files or folders manually. To upgrade or downgrade INCA and its related products and add-ons, it is recommended to use the INCA Service Pack.

INCA differentiates between online (=visualization) and offline (=recording) data. However, online data may not be complete in high "system load situations". Offline data is being buffered internally and ensured to have no gaps in the recorded data file.

The INCA-MIP add-on (MATLAB Integration Package) uses by default the online data because data is always available for all devices at all times. For switching to offline data, an API command is available.

For Rapid prototyping purposes, the ES4xx module chain can be connected directly to the ES910. For measurement with INCA the ES4xx module chain shall be connected directly to the measurement setup (i.e. ES600)

The documentation provided in the PDF format can be viewed and printed using the Adobe Acrobat Reader, which is available free of charge at https://www.adobe.com

The latest version of the INCA manuals in PDF format is part of each INCA Service Pack and installed onto the computer.

2.3. Delivery

The ETAS INCA software is delivered with an installation routine in a ZIP-file or on a DVD including the INCA software, documentation, tools, utilities, and further information. All software documentation is available in the Portable Document Format (PDF), which requires Adobe® Reader®.

The Hardware Service Pack (HSP) installation must also to be installed and used to update the hardware.

Refer to the INCA_V7.5_ServicePack_Release_Notes.pdf for more information.

2.3.1. Used 3rd Party Software

The 3rd Party Open-Source software used by INCA, its add-ons and components is listed in the documentation in the folder \Documentation\OpenSourceSoftware.

The Open-Source Software Attribution documentation (PDF) of INCA covers INCA but also almost all the INCA add-ons and components shipped with the INCA Service Pack.

For all other products and components check the separate Open-Source Software Attribution documentation within this folder.

The documentation of hardware related Open-Source Software Attributions are shipped with HSP (Hardware Service Pack) and can be found within the corresponding folder there.

For 3rd Party software, such as .NET installation or redistributable please refer to the document titled INCA-V7.5-SPz-Whats-new.pdf.

2.4. Installation

Please refer to the document titled INCA_V7.5_Install_Guide_Language.pdf located in the \Documentation\Manuals\ folder of the installation package (ZIP file or DVD).

2.4.1. Installation Hints

Before updating with the INCA Service Pack, shut down all ETAS software. Failure to do so may result in an incomplete installation or issues with the final installation.

It is recommended to use the Setup_ServicePack.exe to install, update, or downgrade to a previous version of the INCA Service Pack. In this case manual uninstallation is not needed.

Licenses should not be installed or uninstalled while licensed software is running. It is recommended to shut down the product and managing licenses before proceeding.

After installation, it is recommended to reboot the computer system.

Refer to the INCA V7.5 ServicePack Release Notes.pdf for more information.

Program-Menu -> ETAS -> INCA 7.5 ServicePack in the \Manuals folder.

2.4.2. Firmware – Hardware Service Pack (HSP)

Important Note:

IT IS NECESSARY TO UPDATE ALL FIRMWARE WITH THE RECOMMENDED HARDWARE SERVICE PACK (HSP) V14.y BEFORE USING INCA V7.5 WITH HARDWARE

With each new ETAS INCA Service Pack, a higher HSP version must be used to update the hardware.

Operation of hardware with a previous firmware version may result in erroneous operation.

Starting with INCA V7.4 SP2, the HSP is included in the INCA Service Pack, and the corresponding version is listed in INCA_V7.5_ServicePack_Release_Notes.pdf.

The latest recommended HSP version is also available on the ETAS download page.

2.5. INCA Supported Hardware

Starting with INCA V7.3, the INCA base installation supports now more hardware by default, eliminating the need for corresponding INCA Add-ons.

2.5.1. ES4xx (Daisy-Chain) and ES6xx Support

INCA supports the following Daisy Chain modules. No further Add-on installation is required:

The following (Daisy-Chain) devices are supported:

Voltage measurement instruments: ES410, ES411, ES413 and ES415

Thermo measurement instruments: ES420 and ES421

- Lambda measurement instruments: ES430, ES432, ES630, ES631, ES635 and ES636

Pulse signal measurement instruments: ES441

Multi-IO Module: ES930

The following ES6xx devices are supported:

Voltage measurement instruments: ES610 and ES611

Thermo measurement instruments: ES620

Voltage and Thermo measurement instruments: ES650

2.5.2. ES1xx, ES5xx, ES8xx and ES9xx Support

INCA supports the following modules. No further Add-on installation is required:

	CAN	CAN FD	CAN XL	LIN	FLX	ETH ⁽¹⁾	ETK	FETK
ES132	Х	Х						
ES134				Χ				
ES160						(2)		
ES162						(2)

ES921.1	Х							

ES922.1	X X				
---------	-----	--	--	--	--

- (1) Automotive Ethernet
- (2) Automotive Ethernet media converter

2.5.2.1. ES92x piggy support in ES91x modules:

	ES920.1	ES921.1	ES922.1
ES910.3-A	Х	Х	Х
ES910.2	Х	Х	
ES910.2-B	Х	Х	
AS951.1-A		Х	

2.5.3. Third-Party Hardware Support

NCA supports several third-party bus interface devices. The required Add-on is included in the INCA Service Pack. To enable the operation of these devices with ETAS software, licenses can be purchased from ETAS. Please contact your ETAS sales representative for more information.

The following third-party hardware is supported in INCA:

	CAN	CAN FD	LIN	FLX	ETH
vCAN	Х	Х			
VX1132	Х	Х			
VX1135	Х	Х		Х	
VX1161.41A	Х	Х			
VX1161.41B	Х	Х		Х	
VN1610	Х	Х			
VN1611	Х	Х	Χ

VN8970 ⁽²⁾	Х	Х	Х	Х	
VN8972 ⁽²⁾	Х	Х	Х	Х	

⁽¹⁾ Automotive Ethernet

2.6. Add-ons and CAN FD Support

The corresponding Add-ons are required to support LIN Monitoring, FlexRay Monitoring, and XCP on FlexRay (MC).

Uses cases supported on CAN FD bus:

- CAN FD Monitoring
- UDS on CAN FD (ISO14229 on ISO15765-2 from 2013-10-22)
- UDS on CAN FD flashing with INCA-ProF
- XCP on CAN FD
- XCP Flash on CAN FD
- CAN FD Frames sending with ProF

2.7. Licensing

INCA, MDA and some INCA Add-ons are protected via electronic licensing. During installation, you can select MDA and the INCA Add-ons by using the INCA Service Pack Installer. To use the products, you must install a license file through the ETAS License Manager. The license manager opens during installation. It can also be started later as an external program located in the ETAS program folder in the Start menu.

To obtain the license, the software Activation ID is required, which is received during the order process. Alternatively, the tool coordinator may provide it.

Please refer to the document titled INCA_V7.5_Install_Guide_Language.pdf located in the \Documentation\Manuals\ folder of the installation package (ZIP file or DVD).

3. Changes

This chapter describes the changes made to the ETAS INCA V7.5 compared to previous versions.

3.1. What's New

For information on the latest updates, please refer to the INCA-V7.5-Whats-new.pdf file located in

⁽²⁾ piggies for VN89xx(A)

the root folder of the DVD or ZIP-file.

3.2. Compatibility to Earlier Releases

INCA V7.5 introduces new functionality and is compatible with previous versions. It can be installed alongside INCA V7.4.

Furthermore, the INCA V7 32-bit database will be automatically converted to an INCA V7 x64-bit database.

However, INCA V7.2 cannot use the database of INCA V7.3 or higher because of the switch to a 64-bit database. It is possible to exchange projects and experiments using the export and import option. However, it is no longer recommended to use the 32-bit version of INCA due to its limitations.

Limitation: The new functionality introduced with INCA V7.5 is not available in previous INCA versions. In summary,

- it is possible to exchange export files or databases with other versions of INCA.
- Migration to INCA V7.5 is easy, safe, and fast.
- Projects created in former INCA V7.2 can be reused thanks to automatic database conversion and the export/import functionality.
- Additionally, databases created with INCA V7.3 and higher can be directly used.
- INCA can be used in distributed development projects thanks to its upward and downward compatibility.

3.2.1. Known Issues Reports

If a technical problem occurs, ETAS creates a Known Issue Report (KIR) and publishes it online. The report contains information about the technical impact and the status of the solution. Therefore, you must check the KIR applicable to this ETAS product version and follow the corresponding instructions before using the product.

The Known Issue Report (KIR) can be found here: http://www.etas.com/kir

3.3. Known Issues

This section describes the general set of known problems of the released version of the ETAS INCA V7.5.

Solved known issues are also listed in the corresponding section of the version history below.

For details and known issues of the included ETAS products and add-ons, please refer to the corresponding Release Notes.

3.3.1. Software related Items

Title

EHI #720329

Problem Number

ProF: Message "StorePermanentlyToTarget failed" if PROF configuration is installed on D: Drive and NtfsDisable8dot3NameCreation Reg Key is set to "2"

INCA supports 8dot3, but only if it is enabled for all volumes used by INCA and the ProF configurations. Mixed volume configurations for the INCA installation and the ProF configuration, for example, one volume with enabled 8dot3 and one without, are not supported. On systems with mixed volume configurations (i.e. setting 2: 8dot3 name creation on a per volume basis), 8dot3 will only be supported when INCA installation and ProF configuration are stored on the same volume, e.g. both on C:\.

Therefore, only the following 8dot3 settings are allowed for installing and using ProF configurations:

0	8dot3 enabled for all volumes on the system -> INCA installation and ProF configurations are allowed on any volume
1	8dot3 disabled for all volumes on the system -> INCA installation and ProF configurations are allowed on any volume
2	8dot3 name creation on a per volume basis -> INCA installation and ProF configuration must be on the same volume, e.g. both on C:\

EHI #637804

The ProF script is aborted due to an incorrect parameter call of a DLL file. A warning is displayed during the ProF Flow Control: "A 32 bit DLL is called by a 64 bit process."

The problem occurs if a 32 bit customer DLL is part of the ProF configuration and the 32 bit customer DLL is included in the [ChangePath] section of the INSTALL.INI file in the ProF configuration.

The root cause of the problem is the entry in the [ChangePath] section in the INSTALL.INI file. During the ProF configuration installation, the 64 bit INCA V7.3 performs a change path instruction on the 32 bit customer DLL and stores the DLL as modified in a 64 bit utility into the target folder of the ProF configuration. The 32 bit DLL changed by the 64 bit utility in INCA V7.3 is corrupted and not operational in both, INCA V7.3 and V7.2 versions.

This is an inconsistence in the ProF configuration when intended to be used in a 64 bit INCA version and has to be adapted on customer side.

Workaround without changes in the ProF configuration:

Remove the ProF configuration installed with the 64 bit INCA version and reinstall it with a 32 bit INCA (V7.2.17 or lower).

Subsequently the ProF configuration works as expected in both INCA 32/64 bit versions.

Workaround with changes in the ProF configuration:

The 32 bit customer DLL entry in the [ChangePath] section in the INSTALL.INI file has to be removed.

Subsequently the adapted ProF configuration installed in INCA V7.3 works in both, INCA 32-/64 bit versions.

#745421

Uninstalling INCA V7.4.x or the INCA-ODX addon V7.4.x after uninstalling INCA V7.5.x or the INCA-ODX addon V7.5.x will fail.

To avoid this issue, make sure to start INCA V7.4.x at least once before uninstalling it or the INCA-ODX addon V7.4.x.

V7.4.x or the INCA-ODX Addon V7. If the computer freezes during record driver. Please update to the latest v Installation: When one of the requirinstalled (or up to date) before the imight be necessary. It is not recomplished for up to date) before the imight be necessary. It is not recomplished for the needed packages in advance. INCA V7.3/V7.4/7.5 64 bit COM-AP-Clients which are compiled for .NE-It is necessary that .NET clients and Multi-Dimensional Measurements measurement arrays as COLUMN_might lead to wrong interpretation at The ASAP2 V1.6 (2009) specification possibility to describe the different between the ASAP2 spec V1.6 introduced as INCA supported 2-dimensional measurement arrays as As result, INCA indexes the measurement introduced LAYOUT. INCA uses as As result, INCA indexes the measurement of the ASAP2 spec V1.6 introduced as INCA will change its default for measurement of the ASAP2 will change its default for measurement with INCA V7.3.3 and high As there are already A2L files in the arrays without LAYOUT with ASAP2 default dependent on the ASAP2 viles with ASAP2 version For A2L files with ASAP2 version If LAYOUT is missing INCA interpredefault dependent on INCA version INCA \ASAP2 viles with ASAP2	Reinstall the INCA-ODX Addon V7.4.x in repair mode V7.4.x or the INCA-ODX Addon V7.4.x. If the computer freezes during recording, it may be dudriver. Please update to the latest version. Installation: When one of the required packages of reinstalled (or up to date) before the installation of the Il might be necessary. It is not recommended to suppre following installation might be not complete or get corneeded packages in advance. INCA V7.3/V7.4/7.5 64 bit COM-API - Clients which are compiled for .NET x86 (32bit) are - It is necessary that .NET clients are compiled for x6. Multi-Dimensional Measurements - ASAP2 LAYOUT: measurement arrays as COLUMN_DIR if LAYOUT ke might lead to wrong interpretation and wrong measur. The ASAP2 V1.6 (2009) specification introduced the possibility to describe the different behavior. As default he ASAP2 spec V1.6 introduced as default ROW_DI INCA supported 2-dimensional measurement arrays introduced LAYOUT. INCA uses as default COLUMN As result, INCA indexes the measurement arrays coluNCA will change its default for measurement arrays cOLUMN_DIR to ROW_DIR beginning with INCA V7. Solution with INCA V7.3.3 and higher: As there are already A2L files in the field that describe arrays without LAYOUT with ASAP2 VERSION vp to default dependent on the ASAP2 VERSION stated in For A2L files with ASAP2 VERSION < 1.7 INCA will for A2L files with ASAP2 VERSION = 1.7 INCA will left the ASAP2 measurement description contains the Legiven memory orientation. If LAYOUT is missing INCA interprets multi-dimension default dependent on INCA version and ASAP2 version INCA \ASAP2 VI.5 V1.6.1 V7.2.x COLUMN_DIR COLUMN_DIR V7.3.2 COLUMN_DIR COLUMN_DIR Recommendation: The creators of A2L files shall use always the optional describe the orientation exactly. J2534 support with INCA V7.3 and V7.4. Usage of 3rd party hardware via J2534 (PassThru): INCA 7.3 and higher as 64-bit application uses 64 bit INCA 7.3 and higher as 64-bit application uses 64 bit	If the computer freezes during recording, it may be due to an outdated ne driver. Please update to the latest version. Installation: When one of the required packages of redistributables or .NE installed (or up to date) before the installation of the INCA Service Pack, in might be necessary. It is not recommended to suppress the reboot in sucle following installation might be not complete or get corrupted. To avoid this needed packages in advance. INCA V7.3/V7.4/7.5 64 bit COM-API - Clients which are compiled for .NET x86 (32bit) are not supported - It is necessary that .NET clients are compiled for x64. Multi-Dimensional Measurements - ASAP2 LAYOUT: INCA interprets MA measurement arrays as COLUMN_DIR if LAYOUT keyword is not defined might lead to wrong interpretation and wrong measure data. The ASAP2 V1.6 (2009) specification introduced the optional LAYOUT to possibility to describe the different behavior. As default, when LAYOUT is the ASAP2 spec V1.6 introduced as default ROW_DIR. INCA supported 2-dimensional measurement arrays already long before a introduced LAYOUT. INCA uses as default COLUMN_DIR. As result, INCA indexes the measurement arrays without LAYOUT from COLUMN_DIR to ROW_DIR beginning with INCA V7.3.3. Solution with INCA V7.3.3 and higher: As there are already A2L files in the field that describe 2-dimensional measurays without LAYOUT with ASAP2 VERSION by to 1.6 INCA will change default dependent on the ASAP2 VERSION >= 1.7 INCA will use ROW_DIR so a lift the ASAP2 measurement description contains the LAYOUT info INCA regiven memory orientation. If LAYOUT is missing INCA interprets multi-dimensional measurement are default dependent on INCA version and ASAP2 version: INCA \ ASAP2 \ V1.5 \ V1.6.1 \ V1.7 V7.2.x \ COLUMN_DIR COLUMN_DIR COLUMN_DIR COLUMN_DIR V7.3.3 ff. COLUMN_DIR COLUMN_DIR ROW_DIR Recommendation: The creators of A2L files shall use always the optional ASAP2 keyword Ledescribe the orientation exactly. J2534 support with INCA V7.3 and V7.4. Usage of 3rd party hardwar

	It was found that existing drivers from other vendors are using a byte alignment that does not match the J2534 specification (J2534_1_2004 spec (section 9.2.2 Attaching to the DII From an Application).
	In 32-bit applications this did not play a role but needs to be considered in 64-bit applications.
	ETAS implemented its J2534 functionality from INCA using this non-standard-conform byte alignment by default to support existing drivers from other vendors.
	In case you find your 3rd party hardware device using J2534 not working together with INCA, please ask the ETAS MCD support for assistance or the standard-conforming version.
	Tested with Vector VN7610.
	With INCA V7.3.2 and higher it is now possible to switch to the standard-conform variant (in case, ask also here your ETAS MCD support for assistance).
EHI #NA	Known issue with 64Bit Integer Support IF
	calibration is done in the INCA experiment or CDM AND
	a parameter of type 64Bit Integer is used AND
	the parameter holds a value that needs more than 52 bits for representation AND
	the user changes the values AND
	uses afterwards 'undo' THEN
	INCA does the 'undo' with the physical representation of the former value. The result is a 'casted' value that has less precision as the original former value.
EHI #NA	XETK & ETK Tools: TC27xED_A microcontroller no longer supported with XETK.
	Micro Controller Support: Removed support of TC27xED_A of XETK in HSP V13.0.0, INCA V7.4.0 and ETK Tools V4.3.0.
	In order to support the TC27xED_A, install and use INCA V7.3.7 and ETK Tool V4.2.7.
EHI #745421	Uninstalling INCA V7.4.x or the INCA-ODX addon V7.4.x after uninstalling INCA V7.5.x or the INCA-ODX addon V7.5.x will fail.
	To avoid this issue, make sure to start INCA V7.4.x at least once before uninstalling it or the INCA-ODX addon V7.4.x.
	If the uninstallation has already started once, use this workaround: Reinstall the INCA-ODX Addon V7.4.x in repair mode before uninstalling INCA V7.4.x or the INCA-ODX Addon V7.4.x.

3.3.2. Hardware related Items

Problem Number	Title
EHI #731074	#731074 Vector VN1670 - device cannot be initialized
	and related
	#724382 Error when measuring with INCA LIN using VN1670 Host

If a VN1670 is in use and the device can be found, but it is not working properly (channels cannot be initialized or timestamps are wrong), it is recommended to perform a factory reset on the device.

Note: Due to missing APIs, there is currently no way for INCA to detect a critical configuration of the device

4. Version History, Refresh and Hotfix Information

This chapter describes changes with respect to the previous version of the INCA including version history in reverse order.

4.1. INCA V7.5.3

4.1.1. Recommended Installation

- It is recommended to use the Setup_ServicePack.exe to install, update, or downgrade to a
 previous version of INCA and the INCA Service Pack. In this case manual uninstallation is not
 needed.
- After the installation of the INCA Service Pack a reboot of the computer system is recommended.
 This is also true for hotfix installations.

4.1.2. New Features and Enhancements

- Performance improvements save up to 30 % time when starting INCA
- See INCA-V7.5-SP3-Whats-new.pdf for all the latest news on the current INCA version.

4.1.3. Known Issue of INCA V7.5.3 and Important Hints

EHI # 778207: ES132 + J1939-22 (CAN FD) cannot be initialized

4.1.4. Bug Fixes and Improvements

- Notes:
 - Some issues can be resolved using the corresponding INCA Add-Ons, which are included in the INCA Service Pack or solved in combination with the current HSP.
 - The EHI calls are listed in ascending order.

4.2. INCA V7.5.2

4.2.1. Recommended Installation

- It is recommended to use the Setup_ServicePack.exe to install, update, or downgrade to a
 previous version of INCA and the INCA Service Pack. In this case manual uninstallation is not
 needed.
- After the installation of the INCA Service Pack a reboot of the computer system is recommended.
 This is also true for hotfix installations.

4.2.2. New Features and Enhancements

- Performance improvements save up to 30 % time when starting INCA
- See INCA-V7.5-SP2-Whats-new.pdf for all the latest news on the current INCA version.

4.2.3. Known Issue of INCA V7.5.2 and Important Hints

NA

4.2.4. Known Issues Solved with INCA V7.5.2 and Important Hints

- N/A

4.2.5. Bug Fixes and Improvements

- Notes:
 - Some issues can be resolved using the corresponding INCA Add-Ons, which are included in the INCA Service Pack or solved in combination with the current HSP.
 - The EHI calls are listed in ascending order.

	Adding Ethernet Monitoring file to project causes [WBID2627158349] receiver must be a
768928	Boolean
769094	FETK-T4.0B with SR6P7 μC: Implausible trace-based measured values.
769209	FETK-S1.1B: INCA stops measurement due to failed to allocate output table memory
769275	ES134: No Devices are shown in INCA Search for Hardware when ES134 is connected.
	ES582.1 doesn't show status LED for CAN2, when channel 2 is in use. Instead, status LED for
770535	CAN1 is displayed. Note: Solved with HSP V14.1.1 and V14.2.0
771542	INCA Touch License is not obtained if Feature V2.1 is in use, but INCA Touch V7.5 is installed

4.3. INCA V7.5.1 HF1

4.3.1. Recommended Installation

- It is recommended to use the Setup_ServicePack.exe to install, update, or downgrade to a
 previous version of INCA and the INCA Service Pack. In this case manual uninstallation is not
 needed.
- After the installation of the INCA Service Pack a reboot of the computer system is recommended.
 This is also true for hotfix installations.

4.3.2. New Features and Enhancements

- See INCA-V7.5-SP1-Whats-new.pdf for all the latest news on the current INCA version.

4.3.3. Known Issue of INCA V7.5.1 HF1 and Important Hints

- See INCA V7.5.1

4.3.4. Known Issues Solved with INCA V7.5.1 HF1 and Important Hints

See next section.

4.3.5. Bug Fixes and Improvements

Problem	Title
Number	
766548	Experiment: changing between Layers leads to crash with [WBID3405970542] Primitive failed in: OSHwnd>>#sendMessageW:message:wParam:lParam: due to Invalid reference in argument 1

768056	CDM: Copy Action from DCM into dataset is not possible for VTAB variables including true/false text values as those are interpreted as 1/0
769094	FETK-T4.0B with SR6P7 μC: Implausible trace-based measured values. Note: Also solved with ETK Tools V4.4.1 Build 100 (or higher).
769275	ES134: No Devices are shown in INCA Search for Hardware when ES134 is connected.

	771542	INCA Touch License is not obtained if Feature V2.1 is in use, but INCA Touch V7.5 is installed	
-	770535	ES582.1 doesn't show status LED for CAN2, when channel 2 is in use. Instead, status	1
		LED for CAN1 is displayed. Note: Solved with HSP V14.1.1 and V14.2.0	

4.4. INCA V7.5.1

4.4.1. Recommended Installation

- It is recommended to use the Setup_ServicePack.exe to install, update, or downgrade to a
 previous version of INCA and the INCA Service Pack. In this case manual uninstallation is not
 needed.
- After the installation of the INCA Service Pack a reboot of the computer system is recommended.
 This is also true for hotfix installations.

4.4.2. New Features and Enhancements

- See INCA-V7.5-SP1-Whats-new.pdf for all the latest news on the current INCA version.

4.4.3. Known Issue of INCA V7.5.1 and Important Hints

- NA

4.4.4. Known Issues Solved with INCA V7.5.1 and Important Hints

#760489 INCA.ini includes path to MDA.exe

This could be exploited to add another executable to the ini file and call it.

Fixed:

Added new option to write only x.y version of used MDA to ini file.

The new entry is called "UsedMDAversion", the old entry is kept in sync to support old INCA versions.

Corresponding section in the ini file:

```
; Deprecated with INCA >= 7.5.1! Selection of the MDA version to be used.
MDApath=C:\Program Files\ETAS\MDA8.5\mda.exe
...
; Selection of the MDA version to be used.
UsedMDAversion=8.5
```

 #756855 When switching to another EE from an opened EE, any calculated signals can be removed from the EE.

IF

you change the experiment view from within the experiment

AND

the new experiment view contains calculated signals

THEN

INCA displays a warning and removes the calculated signals.

IF

the experiment view is then saved

THEN

the calculated signals in the experiment view will be lost.

Workaround: To avoid this, close the experiment, exchange the experiment view in the corresponding workspace and reopen it.

- #762366 FETK-T4.0B with SR6P7 μ C: Implausible trace-based measured values with INCA and HSP.

The ST microcontroller (STM SR6X7 and STM SR6P7) sporadically provides invalid data via the trace interface, which is captured by the FETK-T4.0B and sent to the measurement system. The customer receives this erroneous data and may continue to work with this erroneous data.

As a workaround, the trace data messages are scanned, and the erroneous data packets are identified based on packet type and decoded data. This identified erroneous data is dropped and not forwarded to the customer's measurement system.

This detection may very sporadically result in false positives, discarding valid measurement data. Note: Solved with HSP V14.1.0

4.4.5. Bug Fixes and Improvements

- Notes:
 - Some issues can be resolved using the corresponding INCA Add-Ons, which are included in the INCA Service Pack or solved in combination with the current HSP.
 - The EHI calls are listed in ascending order.

Problem	Title
Number	
549446	MCE-CCP-IlinkRT : Import of CCP workspace from INCA 32-bit leads to device configuration error

4.5. INCA V7.5.0

4.5.1. Recommended Installation

- It is recommended to use the Setup_ServicePack.exe to install, update, or downgrade to a
 previous version of INCA and the INCA Service Pack. In this case manual uninstallation is not
 needed.
- After the installation of the INCA Service Pack a reboot of the computer system is recommended.
 This is also true for hotfix installations.

4.5.2. New Features and Enhancements

- See INCA-V7.5-SP0-Whats-new.pdf for all the latest news on the current INCA version.
- Performance Enhancement:
 - #698252 Parallel HW Init performance improved
 - #733976 INCA Experiment "Read all Calibrations" from File is very slow
 - #753652 Open EE performance improved by approximately 33% when using workspaces with legacy ETKs

4.5.3. Known Issue of INCA V7.5.0 and Important Hints

 #756855 When switching to another EE from an opened EE, any calculated signals can be removed from the EE.

IF

you change the experiment view from within the experiment

AND

the new experiment view contains calculated signals

THEN

INCA displays a warning and removes the calculated signals.

IF

the experiment view is then saved

THEN

the calculated signals in the experiment view will be lost.

Workaround: To avoid this, close the experiment, exchange the experiment view in the corresponding workspace and reopen it.

 #745421 Uninstalling INCA V7.4.x or the INCA-ODX addon V7.4.x after uninstalling INCA V7.5.x or the INCA-ODX addon V7.5.x will fail.

To avoid this issue, make sure to start INCA V7.4.x at least once before uninstalling it or the INCA-ODX addon V7.4.x.

If the uninstallation has already started once, use this workaround:

Reinstall the INCA-ODX Addon V7.4.x in repair mode before uninstalling INCA V7.4.x or the INCA-ODX Addon V7.4.x.

4.5.4. Known Issues Solved with INCA V7.5.0 and Important Hints

- #747559 ETK Tools: Problem while launching ETK-Configuration Tool.
 Support for classic ETKs older than ETK-S20 is removed in ETK-Tools version 4.4 and later. To support old classic ETKs, install ETK-Tools version 4.3.7 or earlier.
- #734702 INCA-ODX: Positive PID Request and engine RPM available, but the values are not shown in the experiment

#746762 INCA-ODX: Cannot measure PID variables when using OBDonCAN ODX-LINK measurement (e.g. measurement of OBD PID signals) does not work, if Softing DTS 8.09 is installed on the PC (e.g. used by INCA 7.2.x ODX-Addon).

Workaround: Uninstall Softing DTS 8.09 and reinstall the INCA ODX-AddOn

_

4.5.5. Bug Fixes and Improvements

- Notes:
 - Some issues can be resolved using the corresponding INCA Add-Ons, which are included in the INCA Service Pack or solved in combination with the current HSP.
 - The EHI calls are listed in ascending order.

Problem	Title
Number	
625061	[NetWBID3716018613] Etas.HWConfiguration.Framework.ConfigException: No schema set for data model with name: J1939MessagesDataModel
628411	No posible to initialise the HW with differen SN when CAN-Output set at HWC
629398	INCA-CAN-Trace: Channels of deleted Device are not deleted
630340	When adding a new CAN Monitoring Object on the hardware page, a CAN DBC file selection dialog appears. Before pressing the "Add" button, a target folder must be selected, even though the folder appears to be pre-selected in the dialog.
653795	[WBID3873537233] Problem handling undefined objects in DB(e.g. DBError does not understand isSGOHIContainer)
671407	HWC: If CAN Configuration dialog is closed with NO this leads to invalid CAN Configuration
672289	F3 Reinit in the Experiment might lead to [NetWBID3819614492] System.Runtime.InteropServices.COMException: Ausnahmefehler des Servers. (Ausnahme von HRESULT: 0x80010105 (RPC_E_SERVERFAULT))
679535	[NetWBID556698742] System.InvalidOperationException: Element 'DewDet_S1B1_I.egyThd_M\XETK:1' with ID ID681524899 not found in input XML for VSD
698252	Parallel HW Init performance improved
699815	Restart of DoIP measurement fails if the EE is reopened from the HWC after parameter change in HWC
705407	[WBID2412416422] EtasWorkingState does not understand buttonStrings
706613	API: Second call of ResetValueToRP gives an incorrect return value "API-Error 54: "action failed""
709429	Editing "User Options -> Experiment -> Measure -> Measure file base name (Preset)" after selection via single click caused [WBID555574661] UndefinedObject does not understand contents. Note: No issue is selected via double click.
715636	Change of variable from CHAR to MEAS not recognized properly by INCA
717946	EE: Close All does not close all widgets in EE

719208	[WBID638856137] EtasWorkingState does not understand buttonStrings
721867	Text block in VUI repositioned unexpectedly
722977	Dialog "Select project": Menue Edit and View are general menues, but are only
700005	working for project. Should be related to currently used context.
723305	The 'Copy' menu item or hotkeys do not copy the label values to the clipboard on the Display Configuration tab
724648	MDA: EE: Possible that INCA and MDA uses different values as Result from Calc Signal
726790	Walkback if hardware is initialized many times after another (stress test):
	[WBID22948649] (ExAssertionFailure) An exception has occurred: Assertion failed
727092	Failed Connection to a single device blocks processing of parallel initialization
728160	EE : Could not match Dialog does not appear for CHARACTERISTICs selected only in (default) recorder (not in EE)
729684	Low Contrast Ratio in Trigger Editor / Recorder Manager Dialog
729841	[WBID63179895] OrderedCollection does not understand includesKey
730086	HWC: Device state is not maintained while opening HWC again.
730766	API: ResetValueToRP does not work with group curve axis.
731310	CDM: The statusbar is not updated after deleting a variable
731339	EE: Oscilloscope within VUI not working
732337	EE: Possible that INCA is hanging when try to open About Box in VSD
733976	INCA Experiment "Read all Calibrations" from File is very slow
734137	MDF Array Index without Underline: "[NetWBID2319331352] System.InvalidOperationException: Variable 'M_MATRIX.DIM22[0][0][0]\ETK- Testdevice:2' not found in device 'ETK-Testdevice:2'" when added special variables and
	reopened VSD again
734702	INCA-ODX: Positive PID Request and engine RPM available, but the values are not
	shown in the experiment
734935	Pressing F3 having grouped devices using Scalar Table Editor results in walkback [WBID2196958495] (ExCLDTKeyNotFound) Key not found.
735718	Battery Imbalance Table (BIT): Possible to copy or move duplicate labels to BIT widget in EE
735802	EE: Possible that Platform Osci is created with several instances from the same label
736950	After a Crash my DB is damaged and cannot be used and DB open crashes again: [WBID4195639978] UndefinedObject does not understand createCalculatedSignalGroup:
736964	INCA-CAN-Trace: CAN-Trace BLF file written incorrectly
737261	Battery Imbalance Table: If calcualted signals are deleted and Experiment is reopened without saving, the signals are lost
737525	EE: Device is already in present after device name changing and 2 times HW init in HWC EE
737594	[WBID707015418] (ExAssertionFailure) An exception has occurred: Assertion failed
738652	EE: "[WBID970990069] UndefinedObject does not understand access" when change device name in HWC EE and open close calculated signal editor
739543	[NetWBID2075006241] System.Data.StrongTypingException: The value for column 'Name' in table 'Recorder' is DBNull.
739704	iLinkRT V3 - duplicated DAQ numbers when multiple devices are used
739864	Upload from XCP: [WBID2452289833] (ExAssertionFailure) An exception has occurred: Assertion failed
740007	GETK-MC-App: INCA API method "GetSystemDescription" is extended with the object for the GETK-MC system
740026	CDM compare with vector value block (TEXT)
740230	ARXML SomeIP CONSUMED-SERVICE-INSTANCE is not visible in the VSD.
	Recommendation: Check if the "missing" signals are in the ARXML file.
740601	[WBID306560295] UndefinedObject does not understand height
740660	INCA V7.4.7: VB Script (COM-API) GetDeviceDescription("CAN-Monitoring") fails due to
	change (was wrongly changed to "CAN Monitoring" - without "-")

740670	CDM: true/false representation does not work for arrays
742694	On two-byte operating systems, INCA cannot be used after opening online help with the
	F1 key.
742759	MPM: After flashing a device in EE initialization method "Current" reinitialize all sibling devices
743317	XETK disconnection leads to OMD reconfiguration when bypass is active
743637	EE: [WBID1894921870] True does not understand actionSelector after reset value to
	reference page with mstest
744064	SOME/IP-MC : ES886.2 - Reconnect fails (also for XCP)
744098	ASAM-2MC Editor contains wrongly "OFF_LINE_DATA" as keyword and creates wrong entry in the A2L - but should be "OFFLINE_DATA"
744157	IP-Manager: IP conflict after automatic IP reassignment
744238	[WBID1362343877] unsupported type / Opening html file in multi-byte path caused system down
744241	EE:Possible to get "[WBID4140564527] EtasCEECustomerWidget class does not understand getCEEType" when delete a calc signal
744653	FETK-T4_Unplausible values for measurement. Note: Solved with INCA V7.4 SP7.1 (HSP V13.7.1) and INCA V7.5 SP0 (HSP V14.0.0)
744963	CDM: When open EE via CDM possible that Monitor Log get filled each second with same entry during the EE is open
744964	Parser does not unterstand MEMORY_SEGMENT key word "NOT_IN_ECU"
745001	API ResetValueToRP does not work for Curve Axis
745472	Components Menu disappearing when VUI is in use at INCA Experiment
745876	MPM: Unkown checksumm is shown as equal checksum in the device list
745883	A2L-File: /include does not work if include A2L created in UTF-8-BOM
746752	MPM: Behavior in case of failed ACC wrong. MPM shall be opened with action "flash".
746762	INCA-ODX: Cannot measure PID variables when using OBDonCAN
746789	INCA Checksum Calculation is not shown in MPM after flashing
747069	MPM: Flash Programming not initially selected when opening MPM with FETK failing ACC
747198	MPM checksum display wrong after reopening MPM
747303	MEMORY_SEGMENT of type DATA NOT_IN_ECU blocks usage of ETK
747405	Virtual Parameters with Formula may not be calculated if used more than once
747559	ETK Tools: Problem while launching ETK-Configuration Tool. Support for classic ETKs older than ETK-S20 is removed in ETK-Tools version 4.4 and later. To support old classic ETKs, install ETK-Tools version 4.3.7 or earlier.
747936	CAL-Wakeup behaviour of INCA differs between INCA versions (INCA7.3.5 - INCA7.4.x).
747944	Copying and pasting multiple calibration values from Excel or a text editor is now blocked. A message will be displayed indicating that INCA only supports copying one value at a time.
747945	When copying and pasting multiple calibration values from a text editor or Excel spreadsheet, the data representation was changed
748334	INCA-ODX: Walkback when initializing UDS device with TPBlob parameters from ODX project if no A2L file is assigned to the UDS device: [WBID1455865447] EtasDiagnosticServiceOnCANDevice does not understand asPSZ
748517	No data in customer instruments that use dynamic variable references. Also affects the INCA add-ons Touch and RDE.
748535	iLinkRT V3: Get option on the HWC doesn't work
749047	Scalar table editor in hex mode switches to physical mode when inserted number is not explicitly specified as hexadecimal
749608	SOME/IP: Wrong COMPU-METHODs for signals of serialized PDUs of ARXML files
749769	CDM: "[WBID1738638892] ASAP2CharacteristicBlob does not understand ySize" can occur when connect to asap2 project and select a dataset
750168	EE: Multi selected paste works in Calibration different when done vie Hotkey or Context Menu
L	mone

750810	INCA-TOUCH comes with red x when map is not aviailable after a2l replace
750916	INCA Initialize Hardware error with pop-up that mentions MCE Connections cannot be
	removed with PUMA
751682	EE_Calculated Signals: Possible that calc signals are not shown in osci after changing 2
	times a calc signal
751898	[WBID3421345940] EtasGroupArrayAccess does not understand registerCEEOnly
753652	Open EE performance improved by approximately 33% when using workspaces with
	legacy ETKs
753868	[WBID2770526384] UndefinedObject does not understand displayFileOrder /
	Performance Issue with Key Variable List
754535	[WBID1477195478] EtasGroupArrayAccess does not understand registerCEEOnly.
	Note: Solved with INCA V7.4 SP7.1.
754594	[NetWBID2498683093] System.NullReferenceException: Object reference not set to an
	instance of an object
755478	CDM Copy Dataset leads to [WBID4103211128] Primitive failed in: Object>>#basicAt:
	due to Index out of range in argument 1
756195	IPETRONIK: Adding another IPETRONIK device leads to changing the CAN controller
	settings
